Good morning Ms. Calitro.

I continue to review the tapes and my notes to make sure that requests of further information get addressed. Regarding items requested from public speakers and myself, I think that it would be useful to have in the record the following items:

(1) Police Reports for the following streets, Spring Street, New Street, and Elm Street, for the dates January 1, 2019 to the day that the reports are populated. The purpose of this request, made by a speaker at the public hearing, appears to want to examine police incidents while the Dorothy Day House had bed shelters and after the bed shelters were removed.

Also, in advance of the next public hearing, it may be useful for the applicant to be aware of the following questions that I will be asking so they can respond that evening.

- (1) Regarding the operation of the business: (a) the total number of staff and other employees, (b), the number of shifts over a 24 hour period and the hours that make up those shifts, (c), the number of staff and other employees are on each shift.
- (2) How are the residents selected?
- (3) Is there any preference for Danbury people to be selected as residents?
- (4) Presently, what is the percentage of Danbury people and non-Danbury people, (specific to Danbury)?
- (5) Have there been any incidents where a member of another Connecticut, (or another state), town or city, other than Danbury, made arrangements to have one of their citizens become accepted as a resident?
- (6) It has been reported that people crossing into the U. S. through the southern border have been transported to Danbury. Can they be residents of the facility?
- (7) It has been reported that people crossing into the U. S. through the southern border have been transported to parts of Connecticut. Can they be residents of the facility?
- (8) It has been reported that people that have recently left Afghanistan may have been transported to Danbury and the Danbury area. Can they be residents of the facility?

Finally, although I have requested a letter from the Corporation Counsel regarding the discrepancy of opinions between the staff and petitioner as it relates to possible site locations, (site specific or other locations), I expect to discuss this with the petitioner, as well.

I am available should you need any further information or have any questions.

I will continue to review the tapes to see if there were any other requests, as the commission was supplied with a very, very large amount of data to re-review and consume.

Please let me know what exhibit number this letter will be assigned.

Thank you.

Theodore J. Haddad, Jr.
